ACHIVEMENT DURING DEANSHIPE PERIOD

- Accrditation

Accrditation of our Faculty which was the first Faculty getting the accreditation in the university and the second on the level of Egyptian Collages of Vet.Med.

- Infrastructure

Complete improvement of infrastructure of the Faculty during preparing for accreditation . This included the rooms of staffs where every staff member has its own room with computers and internet access and new furniture was brought to different staff and administration unit.

- Job Satisfaction

Achievement of Job Satisfaction between the staff members and administration , and the whole employers and students and workers in the Faculty .

- Scientific research

Improvement of scientific research through establishing of well equipped central lab., Modern library , webbed journal , encouragement of publishing in impacted journals.

- Scientific Publication

Benha Veterinary Medical Journal published nowadays on internet and has its own web site . The Journal prepared revised and has a high quality papers

- Library

We added additional library specialized for post graduate students . Both student and Post-graduate library are well equipped supplied with computers and internet .

- Central Laboratoy

We gained a project form the project management unit from the Ministry of Higher Education for the promotion of Scientific research . The project fund was seven million and three hundred thousand pounds. The whole fund directed to improving of the central laboratory beside other from Investment budget of the university . We established one of the most important laboratories in Egypt.

- Educational Farm

Faculty Educational Farm was supplied with different kinds of animals that was not previously present like Camel , Sheep and Goat. Beside different utensils used in the farm .

- Student Affair

We established a central control where each class has its own room and all rooms attached by a long hall where staff correct student papers . The system ensure that no paper go out the control . The whole building supplied with a good security and all furniture are brand new and the rooms supplied with air condition . On the other hands the teaching halls supplied with modern display utilities and have enough lightening and aeration . Television cycles are provided in some laboratories . Students conferences were held in the presence of the staff and discuss all issue and complains of students. Complete changes of student regulations have done to be suitable with the current situation. New and Modereng gen was established for students of both sexes .

- New Programme

New programme have been added where we established a credit hour system programme named veterinary drugs and veterinary preparations beside another programme of food safety . These programme based on the need of the

market. These programmes represent excellent source of fund raising in our Faculty.

- Environmental development

The first time to bring incinerator (Million pound) that is working now for incineration of biological and other hazardous material after disposal . The Faculty organized repeated convoys of treatment of animals in surrounding villages . protocols was held with rotary to help students and workers and support scientific research for young researcher . Special units work properly and increase fund raising .

- Skill raising

We held a lot of workshop where young researcher and experts of great doctors either in our Faculty and others from the field join and transfer their skills in some fields like surgery , obstetric , internal medicine .Other workshops was done to help the people in the neighboring society in rearing of rabbit and production of quill .

- Fund raising

The sources of fund raising in our Faculty showed qualitative and quantities increase increasing . The following are examples :

- establishment of new program which give a good source of income helping us to improve different services in the faculty .

- We gained some important Scientific projects with a very high fund like the project of excellence in scientific research funded 7,300000 pounds and the innovation project for students 2,000000 pounds besides many competitive projects funded from the project unit of higher education and Benha university .

- We established a distinguished central laboratory produce a good fund to the faculty.

- The modern farm is also another source of fund where milk , meat and animals are marketed to the people .

- We signed important protocol with Bank Misr for production of rabbits and quill and we planned that kalubia become the main source of quill in egypt.
- We have many special units like Sonar , diagnosis of poultry diseases , lab animal house , and others

These were examples of fund source in the faculty and the details will mentioned in arabic version .

Others activities and expertise in the general academic work.

Elected as president of staff club at the first election after 25 Jan. revolution . Before this time the position was confined on the president of university . After that I am elected as a general secretary of the union of staff club in Egypt. We had many activities at the level of the whole Egyptian universities like negotiation with the prime minister El- Ganzory about improving the salaries of staff , negotiation with minister of finance for returning of university allowance after being cancelled for emeritus professors. Also we shared for establishing new parameters for scientific leaders and evaluation of quality projects of universities in Consultative Council .
